

THE FACTS ABOUT

SPRINT DIAL INTERNET ACCESSSM

Your business can take advantage of Sprint Dial Internet Access to:

- ▶ **Give employees reliable access to your intranet or the Internet from virtually anywhere around the globe**
- ▶ **Set up extranets to forge closer links with agents, customers, suppliers and other business affiliates**
- ▶ **Connect remote users to a secure Internet private virtual network**

Whether you're on a business trip, in your home office, at a remote site or simply on the move, you need quick, reliable Internet access. Sprint can offer you comprehensive dial service to help you get connected with reliability and ease.

The speeds you need, the coverage you demand and the features you require

- ▶ Select from a wide range of access speeds, up to 56 Kbps analog and 128 Kbps ISDN
- ▶ Connect from over 2,700 points of presence (POPs) worldwide
- ▶ Give your global business travelers and global satellite offices extensive and redundant coverage throughout the world with Internet Roaming Services
- ▶ Enjoy toll-free access, allowing you to connect from any city in the U.S. and from many other countries
- ▶ Customize Sprint Internet Dialer features and functions for your end users
- ▶ Choose the pricing plan best suited to your usage patterns; each plan offers rewards for longer-term and higher-volume commitments
- ▶ Use the Sprint dialer number finder software to conveniently select the closest phone number for access — locally, nationally or internationally
- ▶ Choose dynamic addressing on local rotaries, or dynamic or fixed addressing with toll-free rotaries
- ▶ Add and delete user IDs and modify passwords using convenient Sprint-supplied utilities
- ▶ Get detailed accounting reports providing simplified usage-tracking, itemizing the start and end times of every connection as well as other important data
- ▶ Order call detail records on CD-ROM for easy internal accounting and tracking

**In summary, here's
what Sprint can do
for your business:**

- ▶ **Give remote users a quality Internet dial access service backed by a 99.9% busy-free service level agreement in the U.S.**
- ▶ **Minimize costs by providing over 2,700 access points worldwide**
- ▶ **Provide a total remote access solution that includes dedicated Internet access, Web hosting, IP virtual private networks and more**

The advanced technology you need

- ▶ Sprint supports both PAP (password authentication protocol) and CHAP (challenge-handshake authentication protocol)
- ▶ We have implemented the L2TP (layer-2 tunneling protocol) in our network to give you added network control, flexibility and security
- ▶ Sprint Dial Internet Service supports PPP (point-to-point protocol), SLIP (serial line Internet protocol) and CSLIP (compressed serial line Internet protocol)
- ▶ We provide a 100% four-fiber, bi-directional, SONET access backbone and an advanced IP architecture based on Cisco gigabit switch routers — assuring your connections are reliable and fast

Single source for total Internet solutions

As a Tier 1 Internet service provider, Sprint can help you assemble all the building blocks for a secure and reliable Internet, intranet or extranet solution. In addition to Dial Internet Access, our portfolio includes Dedicated Internet Access, IP Virtual Private Networks, Managed Web Hosting, Managed Security Services, Managed Network Service, and expert consultation to guide your e-business in the right direction. And we back our services with exceptional customer support 24x7.
