Devices and software are constantly evolving — the illustrations you see here are for reference only.
Devices and software are constantly evolving — the illustrations you see here are for reference only.
Assemble your device

Your device uses a nano-SIM card. A SIM card may be preinstalled, or you may be able to use your previous SIM card. Contact your carrier for more details.

Install SIM/microSD card
Place the SIM card and optional microSD card (sold separately) into the tray with the gold contacts facing down.

Charge your device
Before turning on your device, charge it fully.

NOTE Use only charging devices and batteries (if applicable) that are approved by Samsung. Samsung charging devices and batteries are designed for your device to maximize battery life. Using other charging devices and batteries may void your warranty and may cause damage.
Charge the battery

Your device is powered by a rechargeable battery. A charger (charging head and USB Type-C cable) is included with the device for charging the battery from a power outlet.

💡 TIP  While charging, the device and the charger may become hot and stop charging. This usually does not affect the device’s lifespan or performance and is in the device’s normal range of operation. Disconnect the charger from the device and wait for the device to cool down. For more information, visit samsung.com/us/support/answer/ANS00076952.

Start using your device

Use the setup wizard | Lock or unlock your device | Accounts | Navigation | Navigation bar | Bixby | Digital wellbeing | Customize your home screen | Face recognition | Multi window | Enter text

Use the Power key to turn your device on or off. Do not use the device if the body is cracked or broken. Use the device only after it has been repaired.

○ Press and hold the Power key.
  • To turn the device off, press and hold the Power key, and tap Power off. Confirm when prompted.
  • To restart your device, press and hold the Power key, and tap Restart. Confirm when prompted.

Use the setup wizard

The first time you turn your device on, the setup wizard guides you through the basics of setting up your device.

Follow the prompts to choose a default language, connect to a Wi-Fi® network, set up accounts, choose location services, learn about your device’s features, and more.
Get started

Lock or unlock your device

Use your device’s screen lock features to secure your device. By default, the device locks automatically when the screen times out. For more information about screen locks, see Lock screen and security.

Power key
Press to lock. Press to turn on the screen, and then swipe the screen to unlock it.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Accounts

Set up and manage your email accounts, your Google™ Account, and Samsung account.

**TIP** Accounts may support email, calendars, contacts, and other features. See your carrier for more information.

Add a Google Account

Sign in to your Google Account to access your Google cloud storage, apps installed from your account, and make full use of your device’s Android™ features.

1. From Settings, tap Accounts and backup > Accounts.
2. Tap + Add account > Google.

**NOTE** When you sign in to a Google Account, Factory Reset Protection (FRP) is activated. FRP requires your Google Account information when resetting to factory settings. For more information, see Factory reset protection.

Add a Samsung account

Sign in to your Samsung account to access exclusive Samsung content and make full use of Samsung apps.

1. From Settings, tap Accounts and backup > Accounts.
2. Tap + Add account > Samsung account.

**TIP** To quickly access your Samsung account, from Settings tap Samsung account.

Add an Outlook account

Sign in to your Outlook® account to view and manage email messages.

1. From Settings, tap Accounts and backup > Accounts.
2. Tap + Add account > Outlook.
Transfer data from an old device

Use Smart Switch™ to transfer contacts, photos, music, videos, messages, notes, calendars, and more from your old device. Smart Switch can transfer your data via USB cable, Wi-Fi, or computer.

Visit samsung.com/us/support/owners/app/smart-switch to learn more.

1. From Settings, tap Accounts and backup > Smart Switch.
2. Follow the prompts and select the content to transfer.

Visit samsung.com/smartswitch for more information.
Navigation
A touch screen responds best to a light touch from the pad of your finger or a capacitive stylus. Using excessive force or a metallic object on the touch screen may damage the surface and the damage will not be covered by the warranty.

Tap

Lightly touch items to select or launch them.

- Tap an item to select it.
- Double-tap an image to zoom in or out.
Get started

**Swipe**

Lightly drag your finger across the screen.

- Swipe the screen to unlock the device.
- Swipe the screen to scroll through the Home screens or menu options.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Drag and drop

Touch and hold an item, and then move it to a new location.

- Drag an app shortcut to add it to a Home screen.
- Drag a widget to place it in a new location.
Zoom in and out

Bring your thumb and forefinger together or apart to zoom in and out.

- Bring your thumb and forefinger together on the screen to zoom out.
- Move your thumb and forefinger apart on the screen to zoom in.
Touch and hold items to activate them.

- Touch and hold a field to display a pop-up menu of options.
- Touch and hold a Home screen to customize the Home screen.
Navigation bar

The Navigation bar, at the bottom of the screen, displays the navigation keys.
Navigation gestures

To make more space on the screen, you can hide the navigation keys, and instead use gestures to navigate the device. Simply swipe up from the bottom of the screen to navigate the device.

- From Settings, tap Display > Navigation bar > Full screen gestures.
  - Tap Gesture hints to display lines at the bottom of the screen where gestures must be done for each navigation button.

💡 TIP You can also quickly switch between navigation gestures and navigation buttons using the Quick settings menu.

Button order

Personalize your device by changing where the Recent apps and Back buttons display on the Navigation bar.

- From Settings, tap Display > Navigation bar, and tap an option under Button order.

Bixby

Bixby is a virtual assistant that learns, evolves, and adapts to you. It learns your routines, helps you set up reminders based on time and location, and is built in to your favorite apps. Visit samsung.com/us/support/owners/app/Bixby for more information.

The Bixby Home page displays customized content based on your interactions. Bixby learns from your usage patterns and will suggest content you may like.

- From a Home screen, swipe right.
Digital wellbeing

You can monitor and manage your digital habits by getting a daily view of how frequently you use apps, how many notifications you receive, and how often you check your device. You can also set your device to help you wind down before going to bed.

- From Settings, tap Digital wellbeing.
  - Screen time: Tap the time value in the dashboard circle for details on how long each app has been opened and used today.
  - Unlocks: Tap to see how many times each app has been opened today.
  - Notifications: Tap to see how many notifications have been received from each app today.
  - Dashboard: View all dashboard information shown above. Each app can have a timer set to limit usage throughout the day.
  - Wind down: Enable to turn the screen to grayscale and limit notifications before going to bed.
  - Notifications: Configure notification settings for each app.

Customize your home screen

The Home screen is the starting point for navigating your device. You can place your favorite apps and widgets here. You can set up additional Home screens, remove screens, change the order of screens, and choose a main Home screen.

App icons

You can use app icons to launch an app from any Home screen.

- From Apps, touch and hold an app icon, and tap Add to Home.

To remove an icon:

- Touch and hold an app icon, and tap Remove from Home.

💡 NOTE  Removing an icon does not delete the app, it just removes the icon from a Home screen.
Use folders
Organize App shortcuts in folders on an Apps screen or Home screen.
For more information, see Create and use folders.

Wallpapers
You can change the look of the Home and Lock screens by choosing a favorite picture or preloaded wallpaper.

1. From a Home screen, touch and hold the screen.
2. Tap Wallpapers.
3. Tap an image to choose it.
4. Tap Home screen, Lock screen, or Home and lock screens.

Widgets
Add widgets to your home screens for quick access to info or apps.

1. From a Home screen, touch and hold the screen.
2. Tap Widgets, and then touch and hold a widget, drag it to a Home screen, and release it.

Customize Widgets
Once you have added a widget, you can customize where it's located and how it functions.

- From a Home screen, touch and hold a widget, and tap an option:
  - Remove from Home: Delete a widget from your screen.
  - Widget settings: Customize the function or appearance of the widget.
  - App info: Review the widget usage, permissions, and more.
Home screen settings

Customize your Home and Apps screens.

1. From a Home screen, touch and hold the screen.
2. Tap 🌐 Home screen settings to customize:
   - **Home screen layout**: Set your device to have separate Home and Apps screens, or only a Home screen where all apps are located.
   - **Home screen grid**: Choose a layout to determine how icons are arranged on the Home screen.
   - **Apps screen grid**: Choose a layout to determine how icons are arranged on the Apps screen.
   - **Apps button**: Add a button to the Home screen for easy access to the Apps screen.
   - **App icon badges**: Enable to show badges on apps with active notifications. You can also choose the badge style.
   - **Lock Home screen layout**: Prevent items on the Home screen from being removed or repositioned.
   - **Add apps to Home screen**: Automatically add newly-downloaded apps to the Home screen.
   - **Swipe down for notification panel**: Enable this feature to open the Notification panel by swiping down anywhere on the Home screen.
   - **Hide apps**: Choose apps to hide from the Home and App screens. Return to this screen to restore hidden apps. Hidden apps are still installed and can appear as results in Finder searches.
   - **About Home screen**: View version information.
**Status bar**

The Status bar provides device information on the right side and notification alerts on the left.

**Status icons**

- **Battery full**
- **Battery low**
- **Charging**
- **Mute**
- **Airplane mode**
- **Bluetooth active**
- **Wi-Fi active**
- **Location active**

**Notification icons**

- **New email**
- **Download**
- **Upload**
- **Wi-Fi available**

Configure display options for the Status bar.

- From Quick settings, tap > **More options > Status bar** for the following options:
  - **Show notification icons**: Choose how to display notification icons on the Status bar.
  - **Show battery percentage**: Display the battery charge percentage next to the battery icon on the Status bar.
Notification panel

For quick access to notifications, settings, and more, simply open the Notification panel.
View the Notification panel

You can access the Notification panel from any screen.

1. Drag the Status bar down to display the Notification panel.
2. Swipe down the list to see notification details.
   - To open an item, tap it.
   - To clear a single notification, drag the notification left or right.
   - To clear all notifications, tap **Clear**.
   - To customize notifications, tap **Notification settings**.
3. Drag upward from the bottom of the screen or tap **Back** to close the Notification panel.

Quick settings

The Notification panel also provides quick access to device functions using Quick settings.

1. Drag the Status bar down to display the Notification panel.
2. Drag — **View all** downward.
   - Tap a quick setting icon to turn it on or off.
   - Touch and hold a quick setting icon to open the setting.
   - Tap **Search** to search the device.
   - Tap **Settings** to quickly access the device's settings menu.
   - Tap **More options** to reorder Quick settings or to change the button layout.
3. Drag — **View all** upward to close Quick settings.
Face recognition

You can enable Face recognition to unlock your screen. To use your face to unlock your device, you must set a pattern, PIN, or password.

- Face recognition is less secure than Pattern, PIN, or Password. Your device could be unlocked by someone or something that looks like your image.
- Some conditions may affect face recognition, including wearing glasses, hats, beards, or heavy make-up.
- When registering your face, ensure that you are in a well-lit area and the camera lens is clean.

1. From Settings, tap Biometrics and security > Face recognition.
2. Follow the prompts to register your face.

Face recognition management

Customize how face recognition works.

- From Settings, tap Biometrics and security > Face recognition.
- **Remove face data**: Delete existing faces.
- **Face unlock**: Enable or disable face recognition security.
- **Stay on Lock screen**: When you unlock your device with face recognition, stay on the Lock screen until you swipe the screen.
- **Faster recognition**: Turn on for faster face recognition. Turn off to increase security and make it harder to unlock using an image or video of your likeness.
- **Require open eyes**: Facial recognition will only recognize your face when your eyes are open.
- **Brighten screen**: Increase the screen brightness temporarily to improve recognition in dark conditions.
Biometrics preferences

Configure your preferences for biometric security options.

- From Settings, tap Biometrics and security > Biometrics preferences for the following:
  - **Screen transition effect**: Show a transition effect when you use biometrics to unlock your device.

**NOTE** From Settings, tap Biometrics and security > Biometrics security patch to view the software version of your device’s biometric security features.
Multi window

Multitask by using multiple apps at the same time. Apps that support Multi window™ can be displayed together on a split screen. You can switch between the apps and adjust the size of their windows.

1. From any screen, tap Recent apps.
2. Tap the app icon, and then tap Open in split screen view.
3. Tap an app in the other window to add it to the split screen view.
   - Drag the middle of the window border to adjust the window size.
Enter text

Text can be entered using a keyboard or your voice.

- Tap a field to display the Samsung keyboard.
  - Tap Show predictive text to view suggested words while you type.
  - Tap Show toolbar functions to view all keyboard options.
Toolbar functions

The toolbar provides additional helpful functions.

○ From the Samsung keyboard, tap ••• Expand toolbar for the following options:
  • ☑️ Clipboard: Access the clipboard.
  • ☑️ Emojis: Insert an emoji.
  • GIF GIF keyboard: Add animated GIFs.
  • Handwriting: Use your handwriting to enter text.
  • Modes: Select a keyboard layout.
  • Settings: Access keyboard settings.
  • Stickers: Add illustrated stickers.
  • 🔍 Text editing: Use an editing panel to help pinpoint text that you want to cut, copy, and paste.
  • 🔊 Voice input: Use Google Voice™ typing.

Configure the Samsung keyboard

Set customized options for the Samsung keyboard.

○ From the Samsung keyboard, tap ⚙️ Settings for the following options:
  • Languages and types: Set the keyboard type and choose which languages are available on the keyboard.
    – To switch between languages, slide the Space bar sideways.
  • Smart typing: Use predictive text and auto-correction features to prevent common typing mistakes. Type by swiping between letters.
  • Style and layout: Customize the appearance and function of the keyboard.
  • Swipe, touch, and feedback: Customize gestures and feedback.
  • Reset to default settings: Return keyboard to original settings and clear personalized data.
  • About Samsung keyboard: View version and legal information for the Samsung keyboard.
Use Google Voice typing
Instead of typing, enter text by speaking.

1. From the Samsung keyboard, tap 🎤 Voice input.
2. Tap the screen and speak your text.
Configure Google Voice typing
Set customized options for Google Voice typing.

1. From the Samsung keyboard, tap Voice input.
2. Tap Settings for options.
   - **Languages**: Choose the language for the keyboard.
   - **Offline speech recognition**: Download languages for offline Google Voice typing.
   - **Hide offensive words**: Hide potentially offensive words with asterisks.
You can capture high-quality pictures and videos using the Camera app. Images and videos are stored in the Gallery, where you can view and edit them.

**Camera**

Navigate the camera screen | Record videos | Configure shooting mode | Camera settings

**Gallery**

View pictures | Edit pictures | Play video | Edit video | Share pictures and videos | Delete pictures and videos | Take a screenshot
From Apps, tap Camera.
Navigate the camera screen

Take stunning pictures with your device’s front and rear cameras.

1. From 📷 Camera, set up your shot with the following features:
   - Tap the screen where you want the camera to focus.
     - When you tap the screen, a brightness scale appears. Drag the light bulb to adjust the brightness.
   - To quickly switch between the front and rear cameras, swipe the screen up or down.
   - To change to a different shooting mode, swipe the screen right or left.
   - To change camera settings, tap 📱 Settings.

2. Tap 📷 Capture.

Record videos

Record high-quality videos using your device.

1. From 📷 Camera, swipe right or left to change the shooting mode to Video.
2. Tap 📷 Capture to begin recording a video.
   - To temporarily stop recording, tap ⏸️ Pause. To continue recording, tap ⏯ Resume.
3. Tap 📷 Stop when you are finished recording.

Configure shooting mode

Allow the camera to determine the ideal mode for your pictures or choose from several shooting modes.

- From 📷 Camera, touch and hold a shooting mode.
  - **Food**: Take pictures that emphasize the vivid colors of food.
  - **Panorama**: Create a linear image by taking pictures in either a horizontal or vertical direction.
  - **Pro**: Manually adjust the ISO sensitivity, exposure value, white balance, and color tone while taking pictures.
  - **Live focus**: Take artistic pictures by adjusting the depth of field.
Camera and Gallery

• **Photo**: Allow the camera to determine the ideal mode for the picture.
• **Video**: Allow the camera to determine the ideal mode for the video.

**Camera settings**

Use the icons on the main camera screen and the settings menu to configure your camera's settings.

☐ From Apps, tap 📷 Camera 🔄 Settings.

**Intelligent features**

• **Scene optimizer**: Automatically adjust the color settings of your pictures to match the subject matter.

**Pictures**

• **Hold Shutter button to**: Choose an action for when the Shutter button is touched and held.
• **HEIF pictures (Photo)**: Save pictures as high efficiency images to save space. Some sharing sites may not support this format.

**Videos**

• **Rear video size**: Select a resolution. Selecting a higher resolution for higher quality requires more memory.
• **Front video size**: Select a resolution. Selecting a higher resolution for higher quality requires more memory.
• **High efficiency video**: Record videos in HEVC format to save space. Other devices or sharing sites may not support playback of this format.

**Useful features**

• **HDR (rich tone)**: Enables the light sensitivity and color depth features of the device to produce a brighter and richer picture.
• **Pictures as previewed**: Save self-portraits or self-recordings as viewed on the camera screen, not as flipped images.
• **Grid lines**: Display viewfinder grid lines to help compose a picture or video.
• **Location tags**: Attach a GPS location tag to the picture.
• **Camera modes**: Edit your shooting modes.
• **Shooting methods:**
  – **Press Volume key to:** Use the Volume key to take pictures, record video, zoom, or control system volume.
  – **Floating shutter button:** Add an extra shutter button that you can move anywhere on the screen.
  – **Show palm:** Hold your hand out with your palm facing the camera to have your picture taken.
• **Storage location:** Select the memory location.
  – A memory card (not included) must be installed to view Storage location.
• **Quick launch:** Press the **Power key** twice in quick succession to open the camera.
• **Shutter sound:** Play a tone when you take a picture.
• **Watermark:** Add a watermark to your pictures.
• **Reset settings:** Reset the camera settings.
• **About Camera:** View app and software information.
Go to the Gallery to look at all the visual media stored on your device. You can view, edit, and manage pictures and videos.

- From Apps, tap 📷 Gallery.
View pictures
Pictures stored on your device are viewable in the Gallery app.

1. From 🌟 Gallery, tap Pictures.

2. Tap a picture to view it. Swipe left or right to view other pictures or videos.
   - To mark the picture as a favorite, tap ❤️ Favorite.
   - To access the following features, tap More options:
     - Details: View and edit information about the picture.
     - Set as wallpaper: Set the picture as wallpaper.
     - Move to Secure Folder: Move the picture to a Secure Folder.
     - Print: Send the picture to a connected printer.

Edit pictures
Enhance your pictures using the Gallery's editing tools.

1. From 🌟 Gallery, tap Pictures.

2. Tap a picture to view it, and then tap 📐 Edit for the following options:
   - Transform: Rotate, flip, crop, or make other changes to the overall appearance of the picture.
   - Filters: Add color effects.
   - Sticker: Overlay illustrated or animated stickers.
   - Text: Add text to the picture.
   - Draw: Add handwritten text or hand drawn content.
   - Tone: Adjust brightness image controls.

3. Tap Save when finished.
**Play video**

View the videos stored on your device. You can save videos as favorites, and view video details.

1. From 🎥 Gallery, tap Pictures.
2. Tap a video to view it. Swipe left or right to view other pictures or videos.
   - To mark the video as a favorite, tap ❤️ Favorite. The video is added to Favorites under the Albums tab.
   - To access the following features, tap 📀 More options:
     - Details: View and edit information about the video.
     - Move to Secure Folder: Add this video to your Secure Folder.
3. Tap ⚪ Play video to play the video.

**Edit video**

Edit videos stored on your device.

1. From 🎥 Gallery, tap Pictures.
2. Tap a video to view it.
3. Tap 🟡 Edit to cut segments of the video.
4. Tap Save, and then confirm when prompted.

**Share pictures and videos**

Share pictures and videos from the Gallery app.

1. From 🎥 Gallery, tap Pictures.
2. Tap 📀 More options > Share, and then tap pictures and videos to select them.
3. Tap ⬆️ Share, and then choose an app or connection to use for sharing your selection. Follow the prompts.
Delete pictures and videos
Delete pictures and videos stored on your device.

1. From 📷 Gallery, tap ⏰ More options > Edit.
2. Tap pictures and videos to select them, or tap the All checkbox at the top of the screen to select all pictures and videos.
3. Tap 🗑️ Delete, and confirm when prompted.

Take a screenshot
Capture an image of your screen. Your device will automatically create a Screenshots album in the Gallery app.

- From any screen, press and release the Power and Volume down keys.

Screenshot Settings
Control screenshot settings.

- From Settings, tap 🎨 Advanced features > Screenshots.
  - Screenshot toolbar: Show additional options after you take a screenshot.
  - Delete shared screenshots: Automatically delete screenshots after they are shared through the screenshot toolbar.
Apps

Using apps

Samsung apps

Google apps

Microsoft apps
Using apps

The Apps list displays all preloaded and downloaded apps. Apps can be downloaded from Galaxy Store and the Google Play™ store.

- From a Home screen, swipe the screen upward to access the Apps list.

Uninstall or disable apps

Installed apps can be removed from your device. Some apps that are preloaded (available on your device by default) can only be disabled. Disabled apps are turned off and hidden from the Apps list.

- From Apps, touch and hold an app, and tap Uninstall/Disable.

Search for apps

If you are not sure where to find an app or a setting, you can use the Search feature.

1. From Apps, tap Finder search, and enter a word or words. As you type, matching apps and settings appear as results on the screen.
2. Tap a result to go to that app.

TIP You can customize the search settings by tapping More options > Finder settings.

Sort apps

App shortcuts can be listed alphabetically or in your own custom order.

- From Apps, tap More options > Sort for the following sorting options:
  - Custom order: Arrange apps manually.
  - Alphabetical order: Sort apps alphabetically.

TIP When apps are arranged manually (Custom order), empty icon spaces can be removed by tapping More options > Clean up pages.
Create and use folders

You can make folders to organize App shortcuts on the Apps list.

1. From Apps, touch and hold an app shortcut, and then drag it on top of another app shortcut until it is highlighted.
2. Release the app shortcut to create the folder.
   - **Enter folder name**: Name the folder.
   - **Palette**: Change the folder color.
   - **Add apps**: Place more apps in the folder. Tap apps to select them, and then tap Add.
3. Tap ‹ Back to close the folder.

Copy a folder to a Home screen

You can copy a folder to a Home screen.

- From Apps, touch and hold a folder, and tap + Add to Home.

Delete a folder

When you delete a folder, the app shortcuts return to the Apps list.

1. From Apps, touch and hold a folder to delete.
2. Tap 🗑 Delete folder, and confirm when prompted.

App settings

Manage your downloaded and preloaded apps. Options vary by app.

1. From Settings, tap ☰ Apps.
2. Tap ☰ Menu to set which apps to view, and then choose All, Enabled, or Disabled.
3. Tap ☰ More options for the following options:
   - **Sort by**: Sort the apps by size, name, last used, or last updated.
   - **Default apps**: Choose or change apps that are used by default for certain features, like email or browsing the Internet.
• **App permissions**: Control which apps have permissions to use certain features of your device.

• **Show/Hide system apps**: Show or hide system (background) apps.

• **Special access**: Select which apps can have special access permissions to features on your device.

• **Reset app preferences**: Reset options that have been changed. Existing app data is not deleted.

4. Tap an app to view and update information about the app. The following options may be displayed:

• **Uninstall/Disable**: Uninstall or disable the app. Some preloaded apps can only be disabled, not uninstalled.

• **Force stop**: Stop an app that is not working correctly.

• **Mobile data**: View mobile data usage.

• **Battery**: View battery usage since the last full charge.

• **Storage**: Manage the app’s storage usage.

• **Memory**: View memory usage.

• **Notifications**: Configure notifications from the app.

• **Permissions**: View permissions granted to the app for access to your device’s information.

• **Set as default**: Set the app as a default for a certain category of apps.
Samsung apps

The following apps are either preloaded or downloaded over-the-air to your device during setup.

Galaxy Essentials | Galaxy Store | Samsung Flow | SmartThings | Calculator | Calendar | Clock | Contacts | Internet | Messages | My Files | Samsung Notes

Galaxy Essentials

Galaxy Essentials is a collection of specially chosen applications available through Samsung apps. You can access and download a collection of premium content.

- From Apps, tap More options > Galaxy Essentials.

Galaxy Store

Find and download premium apps that are exclusive to Galaxy devices. A Samsung account is required to download from Galaxy Store.

- From Apps, tap Samsung folder > Galaxy Store.

Samsung Flow

Connect your phone and tablet with Samsung Flow. You can then view notifications and reply to messages from your phone on your connected tablet. You can also use Mobile hotspot to access the Internet on your tablet through your phone’s network connection when other networks are not available.

For more information, visit samsung.com/us/support/owners/app/samsung-flow.

- From Apps, tap Samsung folder > Samsung Flow.
**SmartThings**

SmartThings allows you to control, automate, and monitor your home environment through a mobile device to fit your specific needs. You can use the app to connect multiple devices at once or one device at a time. Check the status of your devices by looking at the dashboard.

- From Apps, tap Samsung folder > 🌋 SmartThings, and sign in with your Samsung account.

**NOTE** Non-Samsung connected device errors or defects are not covered by the Samsung warranty; contact the non-Samsung device manufacturer for support.
The Calculator app features both basic and scientific math functions, as well as a unit converter.

- From Apps, tap 📱 Calculator.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Calendar

The Calendar app can be connected to your various online accounts to consolidate all your calendars in one place.

- From Apps, tap Calendar.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
**Add calendars**

Add your accounts to the Calendar app.

1. From 📅 Calendar, tap ☐️ Navigation drawer.
2. Tap ☀️ Settings > Add new account and select an account type.
3. Enter your account information and follow the prompts.

💡 TIP  Accounts may also support email, contacts, and other features.

**Create an event**

Use your Calendar to create events.

1. From 📅 Calendar, tap ➕ Add event to add an event.
2. Enter details for the event, and then tap Save.

**Delete an event**

Delete events from your Calendar.

1. From 📅 Calendar, tap an event, and tap again to edit it.
2. Tap Delete, and confirm when prompted.
The Clock app offers features for keeping track of time and setting alarms.

- From Apps, tap Clock, and tap a tab to use a feature.
Alarm

Use the Alarm tab to set one-time or recurring alarms and choose options for how to be notified.

1. From Clock, tap Add alarm.
2. Tap the following items to configure an alarm:
   - Time: Set a time for the alarm.
   - Day: Choose the days for this alarm.
   - Alarm name: Enter a name for the alarm.
   - Alarm sound: Choose a sound to play for the alarm and drag the slider to set the volume of the alarm.
   - Snooze: Allow snoozing. Set interval and repeat values for the alarm while snoozing.
3. Tap Save to save the alarm.

Delete an alarm

You can delete an alarm that you created.

1. From Clock, touch and hold an alarm.
2. Tap Delete.
**World clock**

The World clock lets you keep track of the current time in multiple cities around the globe.

1. From 🕒 Clock, tap World clock.
2. Tap ➕ Add city > Search for city, and enter the name of the city.
3. Tap the city name in the list, and then tap Add.
   - To remove a city, touch and hold it, and tap 🗑️ Delete.
Time zone converter
Set a time in a city on your World clock list to see what the local times would be in the other listed cities.

1. From Clock, tap World clock.
2. Tap More options > Time zone converter.
3. Tap Menu to choose a different city.
   - To add a city to the list, tap Add city.
4. Swipe the hours, minutes, and period (AM or PM) on the clock to set a time. Local times for the other cities listed are automatically updated.
   - To return the clock to the current time, tap Reset.

Weather settings
Show weather information on your World clock.

1. From Clock, tap World clock.
2. Tap More options > Weather settings and tap to enable or disable weather information.
3. Tap Unit to change from Fahrenheit to Celsius.

Stopwatch
The Stopwatch lets you time events down to a hundredth of a second.

1. From Clock, tap Stopwatch.
2. Tap Start to begin timing.
   - To keep track of lap times, tap Lap.
3. Tap Stop to end timing.
   - To continue timing after stopping the clock, tap Resume.
   - To reset the Stopwatch to zero, tap Reset.
Timer

Set a countdown timer for up to 99 hours, 59 minutes, and 59 seconds.

1. From Clock, tap Timer.

2. Use the keypad and tap Hours, Minutes, and Seconds to set the Timer.

3. Tap Start to begin the Timer.
   - To temporarily stop the Timer, tap Pause. To continue, tap Resume.
   - To stop and reset the Timer, tap Cancel.

Preset timer

Name and save preset timers.

1. From Clock, tap Timer > Add preset timer.

2. Configure the countdown time and timer name.

3. Tap Add to save the timer.
   - To edit a saved preset timer, tap More options > Edit preset timers.
Contacts

Store and manage your contacts. You can synchronize with personal accounts added to your device. Accounts may also support email, calendars, and other features.

- From Apps, tap Contacts > + Create contact.
**Edit a contact**

When editing a contact, you can tap a field and change or delete information, or you can add more fields to the contact’s list of information.

1. From 📞 Contacts, tap a contact.
2. Tap Edit.
3. Tap any of the fields to add, change, or delete information.
4. Tap Save.

**Message a contact**

You can quickly message a contact using their default phone number.

1. From 📞 Contacts, tap a contact.
2. Tap 📬 Message.

**Direct share**

Share content directly with your contacts from within any app. Once enabled, your frequent contacts are displayed in the Share window.

- From Settings, tap 🛠 Advanced features > Direct share, and tap ⬃ to enable the feature.

**Favorites**

When you mark contacts as favorites, they are easily accessible from other apps.

1. From 📞 Contacts, tap a contact.
2. Tap ✭ Add to Favorites to mark the contact as a favorite.
   - To remove the contact from Favorites, tap ✭ Favorite.

**Share a contact**

Share a contact with others by using various sharing methods and services.

1. From 📞 Contacts, tap a contact.
2. Tap Share.
3. Tap either vCard file (VCF) or Text.
4. Choose a sharing method and follow the prompts.

TIP  When viewing a contact, tap QR code to quickly share the information with friends or family. The QR code automatically updates when you change the contact information fields.

Groups
You can use groups to organize your contacts.

Create a group
Create your own contact groups.

1. From 📞 Contacts, tap ☐️ Open drawer > Groups.
2. Tap Create group, and then tap fields to enter information about the group:
   - Group name: Enter a name for the new group.
   - Add member: Select contacts to add to the new group, and then tap Done.
3. Tap Save.

Add or remove group contacts
Add more contacts to a group, or remove contacts.

- From 📞 Contacts, tap ☐️ Open drawer > Groups, and then tap a group.
  - To remove a contact, touch and hold a contact to select it, and then tap Delete.
  - To add a contact, tap ☞ More options > Edit group > Add member, and then tap the contacts you want to add. When finished, tap Done > Save.
Send an email to a group

Send an email to members of a group.

1. From Contacts, tap Open drawer > Groups, and then tap a group.
2. Tap More options > Send email.
3. Tap contacts to select them, or tap the All checkbox at the top of the screen to select all, and then tap Done.
   - Only group members that have an email address in their records are displayed.
4. Choose an email account and follow the prompts.

Delete a group

Delete a group you have created.

1. From Contacts, tap Open drawer > Groups, and then tap a group.
2. Tap More options > Delete.
   - To only delete the group, tap Group only.
   - To delete the group and the contacts in the group, tap Group and members.

Manage contacts

You can import or export contacts, as well as link multiple contacts into one contact entry.

Import contacts

Import contacts to your device as vCard files (VCF).

1. From Contacts, tap Open drawer > Manage contacts.
2. Tap Import or export contacts.
3. Tap Import and follow the prompts.
Export contacts

Export contacts from your device as vCard files (VCF).

1. From 📞 Contacts tap ☰ Open drawer > Manage contacts.
2. Tap Import/export contacts.
3. Tap Export and follow the prompts.

Link contacts

Consolidate contact information from multiple sources into one contact by linking entries into a single contact.

1. From 📞 Contacts, tap the contact to select it.
2. Tap ☰ More options > Link to another contact.
3. Tap contacts to choose them.
4. Tap Link.

To unlink contacts:

1. From 📞 Contacts, tap the contact to select it.
2. Tap ☰ More options > Add/remove linked contacts.
3. Tap Unlink beside contacts to unlink them from the main contact.

Delete contacts

Delete a single contact or multiple contacts.

1. From 📞 Contacts, touch and hold a contact to select it.
   • You can also tap other contacts to select them for deletion.
2. Tap 🗑️ Delete, and confirm when prompted.
Samsung Internet is a simple, fast, and reliable web browser for your device. Experience more secure Web browsing features with Secret Mode, Biometric Web Login, and Contents Blocker.

- From Apps, tap Samsung folder > Internet.

![Samsung Internet interface with various features labeled]

**TIP** Visit samsung.com/us/support/owners/app/samsung-internet for more information.

---

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Browser tabs
Use tabs to view multiple web pages at the same time.

- From Internet, tap Tabs > New tab.
  - To close a tab, tap Tabs > Close tab.

Bookmarks
The Bookmarks page stores Bookmarks, Saved pages, and your browsing History.

Open a Bookmark
Quickly launch a web page from the Bookmarks page.

1. From Internet, tap Bookmarks.
2. Tap a bookmark entry.

Save a web page
Saving a web page stores its content on your device so that you can access it offline.

- From Internet, tap Tools > Add page to > Saved pages.

NOTE To view saved web pages, tap Tools > Saved pages.

View history
To view a list of recently visited web pages:

- From Internet, tap Tools > History.

TIP To clear your browsing history, tap More options > Clear history.

Share pages
Web pages can be shared with your contacts.

- From Internet, tap Tools > Share, and follow the prompts.
**Secret mode**

Pages viewed in Secret mode are not listed in your browser history or search history, and leave no traces (such as cookies) on your device. Secret tabs are a darker shade than the normal tab windows.

Any downloaded files remain on your device after you close the secret tab.

1. From 🌐 Internet, tap 📦 Tabs > Turn on Secret mode.
2. Tap Set password to protect your Secret mode data with a password.

To turn off Secret mode:

- From 🌐 Internet, tap 📦 Tabs > Turn off Secret mode.

**Internet settings**

Modify settings associated with using the Internet app.

- From 🌐 Internet, tap 🛠️ Tools > Settings.
Keep in touch with your contacts by using the Messages app to share photos, send emojis, or just say a quick hello.

- From Apps, tap 📩 Messages > 🔄 Compose new message.

**Message search**

To quickly locate a message, use the search feature.

1. From 📩 Messages, tap 🔍 Search.
2. Enter keywords in the Search field, and then tap 🔍 Search on the keyboard.
Delete conversations
You can remove your conversion history by deleting conversations.

1. From Messages, tap More options > Delete.
2. Tap each conversation you want to delete.
3. Tap Delete, and confirm when prompted.

Emergency alerts
Emergency alerts notify you of imminent threats and other situations. There is no charge for receiving an Emergency alert message.

1. From Messages, tap More options > Settings.
2. Tap Emergency alert settings to customize notifications for emergency alerts.

Message settings
Configure the settings for text and multimedia messages.

○ From Messages, tap More options > Settings.
**Apps**

**My Files**

View and manage files stored on your device, including images, videos, music, and sound clips.

- From Apps, tap **Samsung** folder > **My Files**.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
File groups

Files stored in the device are organized into the following groups:

- **Recent files**: View recently accessed files.
- **Categories**: View your files based on the file type.
- **Storage**: View files saved on your device, optional SD card, and cloud accounts.
  - Cloud drives vary depending on the services you sign in to.
- **Storage analysis**: See what’s taking up space in your storage.

My Files options

Use My Files options to search, edit, clear file history, and more.

- From **My Files**, the following options are available:
  - **Search**: Search for a file or folder.
  - **More options**:
    - **Storage analysis**: See what’s taking up space in your storage.
    - **Settings**: View settings for the app.
Samsung Notes

Use Samsung Notes to create notes containing text, images with footnotes, voice recordings, and music. You can share your notes easily using social networking services.

Visit samsung.com/us/support/owners/app/samsung-notes to learn more.

- From Apps, tap 📋 Samsung Notes > + Create note.
Edit notes

Make edits to notes you create.

1. From Samsung Notes, tap a note to view it.
2. Tap Edit and make changes. When you are finished, tap Save.

Notes options

You can edit, sort, or manage notes.

- From Samsung Notes, tap More options for the following options:
  • Edit: Select notes to share, delete, or move.
  • Sort: Change the way notes are organized.
  • View: Switch between Grid, List, or Simple list.

Notes menu

You can view your notes by category.

- From Samsung Notes, tap Navigation drawer for the following options:
  • All notes: View all notes.
  • Frequently used: Quick access to commonly used notes.
  • Shared notebooks: View notebooks shared with your contacts through your Samsung account.
  • Trash: View deleted notes for up to 15 days.
  • Categories: View notes by category.
  • Settings: View settings for the Samsung Notes app.

Settings

Access Settings

Connections

Sound

Notifications

Display

Device maintenance

Lock screen and security

Accounts

Accessibility

Other settings
Access Settings

There are a couple of ways to access your device settings.

- Drag down the Status bar, and then tap Settings.
- From Apps, tap Settings.

Search for Settings

If you are not sure exactly where to find a certain setting, you can search for it.

1. From Settings, tap Search, and enter keywords.
2. Tap an entry to go to that setting.

Connections

Manage connections between your device and a variety of networks and other devices.

Wi-Fi | Bluetooth | Tablet visibility | Airplane mode | Mobile networks | Data usage | Nearby device scanning | Connect to a printer | Virtual Private Networks | Private DNS | Ethernet

Wi-Fi

You can connect your device to a Wi-Fi network to access the Internet without using your mobile data.

1. From Settings, tap Connections > Wi-Fi, and then tap to turn on Wi-Fi and scan for available networks.
2. Tap a network, and enter a password if required.
Manually connect to a Wi-Fi network

If the Wi-Fi network you want is not listed after a scan, you can still connect to it by entering the information manually.

Ask the Wi-Fi network administrator for the name and password before you begin.

1. From Settings, tap 📷 Connections > Wi-Fi, and then tap ☑️ to turn on Wi-Fi.
2. Tap➕ Add network at the bottom of the list.
3. Enter information about the Wi-Fi network:
   - **Network name**: Type the exact name of the network.
   - **Security**: Select a security option from the list, and enter the password if required.
   - **Auto reconnect**: Choose this option if you want to automatically reconnect to this network whenever you are in range.
   - **Advanced**: Add any advanced options, such as IP and Proxy settings.
4. Tap Save.

Advanced Wi-Fi settings

You can configure connections to various types of Wi-Fi networks and hotspots, manage saved networks and look up your device’s network addresses.

1. From Settings, tap 📷 Connections > Wi-Fi, and then tap ☑️ to turn on Wi-Fi.
2. Tap Advanced.

   - **Switch to mobile data**: When enabled, your device will switch to mobile data whenever the Wi-Fi connection is unstable. When the Wi-Fi signal is strong, it switches back to Wi-Fi.
   - **Turn on Wi-Fi automatically**: Turn on Wi-Fi in frequently-used locations.
   - **Network notification**: Receive notifications when open networks in range are detected.
   - **Manage networks**: View saved Wi-Fi networks and configure whether to auto reconnect to or forget individual networks.
   - **Wi-Fi control history**: View apps that have recently turned your Wi-Fi on or off.
• **Hotspot 2.0**: Connect automatically to Wi-Fi networks that support Hotspot 2.0.

• **Install network certificates**: Install authentication certificates.

• **MAC address**: View your device’s MAC address, which is required when connecting to some secured networks (not configurable).

• **IP address**: View your device’s IP address (not configurable).

**Wi-Fi Direct**

Wi-Fi Direct uses Wi-Fi to share data between devices.

1. From Settings, tap ⏯️ Connections > Wi-Fi, and then tap 📱 to turn on Wi-Fi.
2. Tap Wi-Fi Direct.
3. Tap a device, and then follow the prompts to connect.

💡 **TIP**  When sharing a file, tap 📥 Wi-Fi Direct to use this feature.

**Disconnect from Wi-Fi Direct**

Disconnect your device from a Wi-Fi Direct device.

○ From Settings, tap ⏯️ Connections > Wi-Fi > Wi-Fi Direct. Tap a device to disconnect it.

**Bluetooth**

You can pair your device to other Bluetooth-enabled devices, like Bluetooth® headphones or a Bluetooth-enabled vehicle infotainment system. Once a pairing is created, the devices remember each other and can exchange information without having to enter the passkey again.

1. From Settings, tap ⏯️ Connections > Bluetooth, and then tap 📱 to turn on Bluetooth.
2. Tap a device and follow the prompts to connect.

💡 **TIP**  When sharing a file, tap 📤 Bluetooth to use this feature.
**Rename a paired device**

You can rename a paired device to make it easier to recognize.

1. From Settings, tap Connections > Bluetooth, and then tap to turn on Bluetooth.
2. Tap Settings next to the device name, and then tap Rename.
3. Enter a new name, and tap Rename.

**Unpair from a Bluetooth device**

When you unpair from a Bluetooth device, the two devices no longer recognize each other.

1. From Settings, tap Connections > Bluetooth, and then tap to turn on Bluetooth.
2. Tap Settings next to the device, and then tap Unpair.

💡 TIP  You will need to pair with the device again in order to connect to it.

**Advanced options**

Additional Bluetooth features are available in the Advanced menu.

1. From Settings, tap Connections > Bluetooth.
2. Tap Advanced for the following options:
   - **Tablet name:** Change the name of your device for Bluetooth connections.
   - **Received files:** View a list of files received using Bluetooth.
   - **Media volume sync:** Sync the volume level set on the connected Bluetooth devices to your device.
   - **Bluetooth control history:** View apps that have used Bluetooth recently.

**Tablet visibility**

Turn on visibility to allow other Bluetooth devices to find your device.

- From Settings, tap Connections > Tablet visibility, and then tap to make your device visible.
**Airplane mode**

Airplane mode disconnects your device from all networks and turns off connectivity features.

1. From Settings, tap ☰ Connections > Airplane mode.
2. Tap ☐ to enable this feature.

**Mobile networks**

Use Mobile networks to configure your device's ability to connect to mobile networks and use mobile data.

- From Settings, tap ☰ Connections > Mobile networks.
  - **Network mode**: You can select which network modes your mobile device can use.
  - **Access Point Names**: Choose or add APNs, which have the network settings your device needs to connect to your provider.
  - **Network operators**: Choose available and preferred networks.

**TIP** Use these features to help manage connection settings that may affect your monthly bill.

**Data usage**

Check your current mobile and Wi-Fi data usage. You can also customize warnings and limits.

- From Settings, tap ☰ Connections > Data usage.

**Turn on Data saver**

Use Data saver to reduce your data consumption by preventing selected apps from sending or receiving data in the background.

1. From Settings, tap ☰ Connections > Data usage > Data saver.
2. Tap ☐ to turn on Data saver.
   - To allow some apps to have unrestricted data usage, tap Allow app while Data saver on, and tap ☐ next to each app to specify restrictions.
Monitor mobile data

You can customize your mobile data access by setting limits and restrictions.

- From Settings, tap ☰️ Connections > Data usage. The following options are available:
  - **Mobile data**: Use mobile data from your plan.
  - **Mobile data only apps**: Set apps to always use mobile data, even when your device is connected to Wi-Fi.
  - **Alert me about data usage**: Enable alerts for when your mobile data usage reaches the amount you chose.
  - **Mobile data usage**: View data usage over mobile connections over a period of time. You can view total usage as well as usage by app.
  - **Billing cycle and data warning**: Change the monthly date to align with your carrier’s billing date.

💡 **TIP** Use these features to keep an eye on your estimated data usage.

Monitor Wi-Fi data

You can restrict Wi-Fi data access by customizing usage limits and networks.

1. From Settings, tap ☰️ Connections > Data usage.
2. Tap **Wi-Fi data usage** to view data usage over Wi-Fi connections over a period of time. You can view total usage as well as usage by app.

Nearby device scanning

Easily set up connections to other available devices by turning on Nearby device scanning. This feature sends you a notification when there are available devices to connect to.

1. From Settings, tap ☰️ Connections > More connection settings > Nearby device scanning.
2. Tap ☯️ to turn on the feature.
Connect to a printer

Connect your device to a printer on the same Wi-Fi network to easily print documents and images from your device.

1. From Settings, tap Connections > More connection settings > Printing.
2. Tap Download plugin and follow the prompts to add a print service.
3. Tap the print service, and then tap More options > Add printer.

💡 NOTE  Not all apps support printing.

Virtual Private Networks

A Virtual Private Network (VPN) allows you to connect to a private secured network from your device. Connection information is needed from your VPN administrator, and you need to set a secure screen lock on your device.

1. From Settings, tap Connections > More connection settings > VPN.
2. Tap More options > Add VPN profile.
3. Enter the VPN network information provided by your network administrator, and tap Save.

Manage a VPN

Use the VPN settings menu to edit or delete a VPN connection.

1. From Settings, tap Connections > More connection settings > VPN.
2. Tap Settings next to a VPN.
3. Edit the VPN and tap Save, or tap Delete to remove the VPN.

Connect to a VPN

Once you have set up a VPN, connecting to and disconnecting from a VPN is easy.

1. From Settings, tap Connections > More connection settings > VPN.
2. Tap a VPN, enter your log in information, and tap Connect.
   - To disconnect, tap the VPN, and then tap Disconnect.
Private DNS

You can configure your device to connect to a private DNS host.

1. From Settings, tap ✡ Connections > More connection settings > Private DNS.
2. Tap one of the available options to configure a private DNS connection.
3. Tap Save.

Ethernet

If wireless network connection is not available, you can use an Ethernet cable to connect your device to a local network. You need an adapter (not included) to connect an Ethernet cable to your device.

1. Connect an Ethernet cable to your device.
2. From Settings, tap ✡ Connections > More connection settings > Ethernet, and follow the prompts.

Sound

You can control the sounds used to indicate notifications, screen touches, and other interactions.

Sound mode | Notification sounds | Volume | System sounds | Dolby Atmos | Equalizer | Headset audio options | Adapt sound | Separate app sound

Sound mode

You can change the sound mode on your device without using the volume keys.

- From Settings, tap ✡ Sound > Sound mode, and then choose a mode:
  - Sound: Use the sounds, vibrations, and volume levels you have chosen in Sound settings for notifications and alerts.
  - Mute: Set your device to make no sounds.
    - Temporary mute: Set a time limit for muting the device.

TIP Use the sound mode setting instead of the volume keys to change the sound mode without losing your customized sound levels.
**Notification sounds**

Choose a preset sound for all notification alerts.

1. From Settings, tap 🎵 Sound > Notification sounds.
2. Tap a sound to hear a preview and select it.
3. Tap OK to save your selection.

**TIP** You can also customize notifications sounds to be unique for each app using the Apps settings menu.

**Volume**

Set the volume level for notifications and other audio.

- From Settings, tap 🎵 Sound > Volume, and drag the sliders.

**TIP** You can also use the Volume key to adjust the volume. Slide the volume controls to customize all volume options.

**Use Volume keys for media**

Set the default of the Volume key to control the media volume.

1. From Settings, tap 🎵 Sound.
2. Tap Use Volume keys for media to enable this feature.

**Media volume limiter**

Limit the maximum output of the device’s volume while using headphones or Bluetooth speakers (not included).

1. From Settings, tap 🎵 Sound > Volume.
2. Tap More options > Media volume limiter.
3. Tap to enable this feature.
   - To set the maximum output volume, drag the Custom volume limit slider.
   - To require a PIN to make changes to the volume setting, tap Set volume limit PIN.
System sounds

Customize your device's sounds for actions like tapping the screen and charging the device.

- From Settings, tap ⏱️ Sound > System sounds for the following options:
  - Touch sound: Play tones when you touch or tap the screen to make selections.
  - Screen lock sound: Play a sound when you unlock the screen.
  - Charging sound: Play a sound when a charger is connected.
  - Keyboard sound: Play a sound when typing with the Samsung keyboard.

Dolby Atmos

Enjoy Dolby Atmos quality when playing content that was specifically mixed for Atmos. This feature may only be available with a headset connected.

1. From Settings, tap ⏱️ Sound > Advanced sound settings > Sound quality and effects.
2. Tap Dolby Atmos to experience breakthrough audio that flows above and around you.

Equalizer

Choose an audio preset that is customized to different genres of music, or manually change your audio settings.

1. From Settings, tap ⏱️ Sound > Advanced sound settings > Sound quality and effects.
2. Tap Equalizer to choose a music genre.

Headset audio options

Enhance the sound resolution of music and videos for a clearer listening experience. These features are only available with a headset connected.

- From Settings, tap ⏱️ Sound > Advanced sound settings > Sound quality and effects, and tap an option to turn it on:
  - UHQ upscaler: Sharpens audio resolution for crisp sound.
Adapt sound

Customize the sound for each ear and enhance your listening experience.

1. From Settings, tap 🎧 Sound > Advanced sound settings > Sound quality and effects > Adapt sound.
2. Tap the sound profile that fits you best, and tap 🎧 Settings to customize.

💡 Tap ➕ Add personalized sound profile to have your device identify the best sound profile for you.

Separate app sound

You can play media sound on a speaker or headphones separate from the rest of the sounds on your device. Connect to a Bluetooth device to make this option available in the Audio device menu.

1. From Settings, tap 🎧 Sound > Advanced sound settings > Separate app sound.
2. Tap ☑ to enable Separate app sound, and then set the following options:
   - App: Choose an app to play its sound on a separate audio device.
   - Audio device: Choose the audio device that you want the app’s sound to be played on.

Notifications

You can prioritize and streamline app alerts by changing which apps send notifications and how notifications alert you.

Manage notifications | Customize app notifications | Smart pop-up view

Manage notifications

You can configure notifications from apps and services.

From Settings, tap 📬 Notifications.

- App icon badges: Identify which apps have active notifications with badges that appear on their icons. Tap to choose whether or not badges indicate the number of unread notifications.
• **Do not disturb**: Block sounds and notifications while this mode is turned on. Specify exceptions for people, apps, and alarms.

• **Status bar**: Modify how many notifications appear on the Status bar.

• To block notifications from an app, tap next to the app. Tap **See all** to open the complete list of apps.

**Customize app notifications**

You can change notification settings for each app.

1. From Settings, tap 📨 **Notifications > See all**.

2. Tap an app for the following options:

   • **Show notifications**: Receive notifications from this app.

   • **App icon badges**: Show a badge on the icon when there are notifications.

   • **Categories**: Configure notification options that are specific to this app.

**Smart pop-up view**

Receive notifications as icons that can be tapped and expanded in pop-up view.

○ From Settings, tap 🎉 **Advanced features > Smart pop-up view**, and tap to enable.
Display

You can configure the screen brightness, timeout delay, font size, and many other display settings.

Screen brightness | Night mode | Font size and style | Screen zoom | Screen timeout | Screen saver | Reduce animations | Smart stay

Screen brightness

Adjust the screen brightness according to lighting conditions or personal preference.

1. From Settings, tap Display.
2. Customize options under Brightness:
   • Drag the Brightness slider to set a custom brightness level.
   • Tap Outdoor mode to increase the screen brightness for 15 minutes for greater visibility when outdoors.

Night mode

Night mode allows you to switch to a darker theme to keep your eyes more comfortable at night.

○ From Settings, tap Display > Night mode for the following options:
  • Turn on now: Put your device in Night mode.
  • Turn on as scheduled: Configure Night mode for either Sunset to sunrise or Custom schedule.
Font size and style

You can change the font size and style to customize your device.

- From Settings, tap ☀ Display > Font size and style for the following options:
  - Tap Font style to choose a different font.
    - Tap a font to select it, or tap + Download fonts to add fonts from Galaxy Store.
  - Tap Bold font to make all fonts appear with bold weight.
  - Drag the Font size slider to adjust the size of text.

Screen zoom

Adjust the zoom level to increase or decrease the size of content on the screen.

1. From Settings, tap ☀ Display > Screen zoom.
2. Drag the Screen zoom slider to adjust the zoom level.

Screen timeout

You can set the screen to turn off after a set amount of time.

- From Settings, tap ☀ Display > Screen timeout, and tap a time limit to set it.

Screen saver

You can display colors or photos when the screen turns off or while charging.

1. From Settings, tap ☀ Display > Screen saver.
2. Tap ☑ to enable the feature and configure the following options:
   - Colors: Tap the selector to display a changing screen of colors.
   - Photo table: Display pictures in a photo table.
   - Photo frame: Display pictures in a photo frame.
   - Photos: Display pictures from your Google Photos account.
3. Tap Preview for a demonstration of the selected Screen saver.

💡 Tap ☀ Settings next to a feature for additional options.
Reduce animations

Decrease certain motion effects, such as when opening apps.

- From Settings, tap ⚙️ Advanced features > Reduce animations, and tap ☐ to enable the feature.

Smart stay

Smart stay uses the front camera to detect your face so that the screen stays on while you are looking at it.

- From Settings, tap ⚙️ Advanced features > Motions and gestures > Smart stay, and tap ☐ to enable the feature.

Device maintenance

View the status of your device’s battery, storage, and memory. You can also automatically optimize your device’s system resources.

Quick optimization | Battery | Storage | Memory | Language and input | Date and time | Troubleshooting

Quick optimization

The quick optimization feature improves device performance through the following actions:

- Identifying apps that use excessive battery power and clearing unneeded items from memory.
- Deleting unnecessary files and closing apps running in the background.
- Scanning for malware.

To use the quick optimization feature:

- From Settings, tap ⚙️ Device care > Optimize now.
**Battery**

View how battery power is used for your various device activities.

- From Settings, tap 📰 Device care > Battery for options:
  - **Battery usage**: View power usage by app and service.
  - **Power mode**: Select a power mode to extend battery life.
  - **Usage by apps**: View power usage by app today or over the past week.
  - **More options > Settings**: Configure advanced battery settings and notifications.

**Storage**

View the device storage and usage. You can also mount, unmount, or format an optional memory card (not included).

**Device storage**

Quickly optimize your device’s storage, increasing available memory.

- From Settings, tap 📰 Device care > Storage > Clean now.

**Memory card**

Once an optional microSD memory card (not included) has been installed in your device, the card memory is displayed in the Storage setting.

For more information, see Assemble your device.

**Mount a memory card**

When you install an optional memory card, it is automatically mounted (connected to the device) and prepared for use. However, should you unmount the card without removing it from the device, you need to mount it before it can be accessed.

1. From Settings, tap 📰 Device care > Storage.
2. Tap 📰 More options > Storage settings.
3. Under Portable storage, tap your SD card, and then tap Mount.
Remove a memory card

To prevent damage to information stored on the memory card, unmount the card before removing it from the device.

1. From Settings, tap Device care > Storage.
2. Tap More options > Storage settings.
3. Under Portable storage, tap your SD card, and then tap Unmount.
4. Remove your memory card from the device.

Format a memory card

When formatting an SD card, you should back up your music and photo files that are stored on the card because formatting the SD card deletes ALL stored files.

1. From Settings, tap Device care > Storage.
2. Tap More options > Storage settings.
3. Under Portable storage, tap your SD card, tap Format, and then follow the prompts.

Memory

Check the amount of available memory. You can close background apps and reduce the amount of memory you are using to speed up your device.

1. From Settings, tap Device care > Memory.
   • The used and available memory are shown.
2. To free up as much memory as possible, tap Clean now and follow the prompts.
   • The selected apps and services in the list will be closed.
Language and input

Configure your device's language and input settings.

Change the device language

You can add languages to your list and organize them according to preference. If an app does not support your default language, then it will move to the next supported language in your list.

1. From Settings, tap General management > Language and input > Language.
2. Tap Add language, and select a language from the list.
3. Tap Set as default to change the device language.
   - To switch to another language on the list, drag Move next to the desired language to the top of the list, and then tap Apply.

Default keyboard

You can select a default keyboard for your device’s menus and keyboards. Additional keyboards can be downloaded from the Google Play store.

1. From Settings, tap General management > Language and input.
2. Tap Default keyboard, and select a keyboard.

Google Voice typing

Speak rather than type your text entries using Google Voice™ typing.

1. From Settings, tap General management > Language and input.
2. Tap On-screen keyboard > Google Voice typing to customize settings.

Manage on-screen keyboards

Enable or disable on-screen keyboards.

1. From Settings, tap General management > Language and input.
2. Tap On-screen keyboard > Manage keyboards.
3. Tap each keyboard to enable or disable.
Physical keyboards
Customize options when you have a physical keyboard connected to your device (sold separately).

1. From Settings, tap General management > Language and input.
2. Tap Physical keyboard, and then choose an option:
   • Show on-screen keyboard: Show the on-screen keyboard while a physical keyboard is also being used.
   • Keyboard shortcuts: Show explanations of the keyboard shortcuts on the screen.

Show keyboard button
Show a button on the Navigation bar to quickly switch between keyboards.

1. From Settings, tap General management > Language and input.
2. Tap Show keyboard button to enable this feature.

Autofill service
Save time entering information using autofill services.

1. From Settings, tap General Management > Language and input.
2. Tap Autofill service and select your preferred service.

Text-to-speech
Configure your Text-to-Speech (TTS) options. TTS is used for various accessibility features, such as Voice Assistant.

- From Settings, tap General management > Language and input > Text-to-speech for options:
  • Preferred engine: Choose either the Samsung or Google Text-to-speech engine. Tap Settings for options.
  • Language: Set the default speech language.
  • Speech rate: Set the speed at which the text is spoken.
  • Pitch: Set the pitch of the speech.
• **Play**: Tap to play a short demonstration of speech synthesis.
• **Reset**: Reset the speech rate and pitch.

**Pointer speed**
Configure pointer speed for an optional mouse or trackpad (not included).
1. From Settings, tap Settings > General management > Language and input.
2. Under Pointer speed, drag the slider to the right to go faster or to the left to go slower.

**Primary mouse button**
You can define which mouse button that you favor as primary.
1. From Settings, tap Settings > General management > Language and input.
2. Tap Primary mouse button, and choose either Left or Right.

**Date and time**
By default, your device receives date and time information from the wireless network. Outside of network coverage, you can set the date and time manually.

○ From Settings, tap Settings > General management > Date and time. The following options are available:
  • **Automatic date and time**: Receive date and time updates from your wireless network. When Automatic date and time is disabled, the following options are available:
    – **Select time zone**: Choose a new time zone.
    – **Set date**: Enter the current date.
    – **Set time**: Enter the current time.
  • **Use 24-hour format**: Set the format for displaying time.
Troubleshooting

You can also check for software updates, and if necessary, reset services on your device.

System updates

Check for and install available software updates for your device.

- From Settings, tap System updates for the following options:
  - Download and install: Check for software updates.
  - Auto download over Wi-Fi: Download software updates automatically when connected to a Wi-Fi network.
  - Last update: View information about the last software update.
  - Update PRL: Download and install the Preferred Roaming List update.
  - Update Profile: Automatically update your user profile information.
  - UICC unlock: Enable the SIM slot to use another carrier’s SIM card. Contact your service provider for assistance.

Reset

Reset device and network settings. You can also reset your device to its factory defaults.

Reset settings

You can reset your device to its factory default settings, which resets everything except the security, language, and account settings. Personal data is not affected.

1. From Settings, tap General management > Reset > Reset settings.
2. Tap Reset settings, and confirm when prompted.

Reset network settings

You can reset Wi-Fi, mobile data, and Bluetooth settings with Reset network settings.

1. From Settings, tap General management > Reset > Reset network settings.
2. Tap Reset settings, and confirm when prompted.
Reset accessibility settings
You can reset device accessibility settings. Accessibility settings in downloaded apps and your personal data are not affected.

1. From Settings, tap General management > Reset > Reset accessibility settings.
2. Tap Reset settings, and confirm when prompted.

Auto restart
Optimize your device by restarting it automatically at set times. Any unsaved data will be lost when the device restarts.

1. From Settings, tap General management > Reset > Auto restart.
2. Tap to activate Auto restart, and then set the following parameters:
   - Days: Select the day of the week to automatically restart your device.
   - Time: Set the time of day to restart your device.

Factory data reset
You can reset your device to factory defaults, erasing all data from your device.

This action permanently erases ALL data from the device, including Google or other account settings, system and application data and settings, downloaded applications, as well as your music, photos, videos, and other files. Any data stored on an external SD card is not affected.

When you sign in to a Google Account on your device, Factory Reset Protection is activated. This protects your device in the event it is lost or stolen.

If you reset your device to factory default settings with the Factory Reset Protection (FRP) feature activated, you must enter the user name and password for a registered Google Account to regain access to the device. You will not be able to access the device without the correct credentials.

**NOTE** If you reset your Google Account password, it can take 24 hours for the password reset to sync with all devices registered to the account.
Before resetting your device:

1. Verify that the information you want to keep has transferred to your storage area.
2. Log in to your Google Account and confirm your user name and password.

To reset your device:

1. From Settings, tap  General management  >  Reset  >  Factory data reset.
2. Tap  Reset  and follow the prompts to perform the reset.
3. When the device restarts, follow the prompts to set up your device.

**Factory reset protection**

When you sign in to a Google Account on your device, Factory Reset Protection is activated. Factory Reset Protection (FRP) prevents other people from using your device if it is reset to factory settings without your permission. For example, if your device is lost or stolen and a factory data reset is performed, only someone with your Google Account username and password can use the device.

You will not be able to access the device after a factory data reset if you do not have your Google Account username and password.

⚠️ **CAUTION** Before sending your device to Samsung or taking it to a Samsung-authorized service center, remove your Google Account and then perform a factory data reset. For more information, visit samsung.com/us/support/frp.

**Enable factory reset protection**

Adding a Google Account to your device automatically activates the FRP security feature.

**Disable factory reset protection**

To disable FRP, remove all Google Accounts from the device.

1. From Settings, tap  Accounts and backup  >  Accounts  >  [Google Account].
2. Tap  Remove account.
Lock screen and security

You can secure your device and protect your data by setting a screen lock.

Screen lock types | Google Play Protect | Find My Mobile | Security update | Install unknown apps | Secure Folder | Encrypt SD card | View passwords | Security update service | Device administration | Credential storage | Strong protection | Advanced security settings | Location | App permissions | Send diagnostic data

Screen lock types

You can choose from the following screen lock types that offer high, medium, or no security: Swipe, Pattern, PIN, Password, and None.

NOTE Biometric locks are also available to protect access to your device and sensitive data on your device. For more information, see Face recognition.

Set a secure screen lock

It is recommended that you secure your device using a secure screen lock (Pattern, PIN, or Password).

1. From Settings, tap Lock screen > Screen lock type and tap a secure screen lock (Pattern, PIN, or Password).
2. Tap to enable showing notifications on the lock screen. The following options are available:
   - View style: Display notification details or hide them and show only an icon.
   - Hide content: Do not show notifications in the notification panel.
3. Tap Done when finished.
4. Configure the following screen lock options:
   - Smart Lock: Unlock your device automatically when trusted locations or other devices have been detected. A secure screen lock is required for this feature.
   - Secure lock settings: Customize your secure lock settings. A secure screen lock is required for this feature.
Clock and information

You can configure features that appear on the Lock screen, like the clock and other useful information.

- From Settings, tap 📅 Lock screen for the following options:
  - Clock style: Set the type and color of the clock on the Lock screen.
  - Roaming clock: Change to digital clocks showing both local and home time zones when roaming.
  - FaceWidgets: Enable widgets on the Lock screen to get quick access to useful information.
  - Contact information: Show your contact information, such as your phone number or email address.
  - Notifications: Select which notifications to display on the Lock screen.
  - App shortcuts: Select which apps to open from the Lock screen.
  - About Lock screen: Update the Lock screen’s software.

Google Play Protect

You can configure Google Play Protect to regularly check your apps and device for security risks and threats.

1. From Settings, tap Biometrics and security > Google Play Protect.
2. Tap options to customize security features.

Find My Mobile

You can protect your device from loss or theft by allowing your device to be locked, tracked online, and for your data to be deleted remotely. A Samsung account is required, and Google location service must be turned on in order to use Find My Mobile. For more information, visit samsung.com/us/support/owners/app/find-my-mobile.
Turn on Find My Mobile

Before you can use the Find My Mobile feature, you must turn it on and customize the options. To access your device remotely, visit findmymobile.samsung.com.

1. From Settings, tap Biometrics and security > Find My Mobile.
2. Tap to enable Find My Mobile and log in to your Samsung account. The following options are available:
   • Remote unlock: Allow Samsung to store your PIN, pattern, or password, allowing you to unlock and control your device remotely.
   • Send last location: Allow your device to send its last location to the Find My Mobile server when the remaining battery charge falls below a certain level.

Security update

You can easily check the date of the last installed security software update and find out if newer updates are available.

○ From Settings, tap Biometrics and security > Security update to see the latest security update installed and check if a newer update is available.

Install unknown apps

You can allow installation of unknown third-party apps from selected apps or sources.

1. From Settings, tap Biometrics and security > Install unknown apps.
2. Tap an app or source, and then tap Allow from this source.

TIP. Installing unknown third-party apps could make your device and personal data more vulnerable to security risks.

Secure Folder

You can create a secure folder on your device to protect private content and apps from anyone who may be using your device. You must sign in to your Samsung account to set up and use Secure folder.

○ From Settings, tap Biometrics and security > Secure Folder and follow the prompts to secure content on your device.
Encrypt SD card

You can encrypt your optional memory card (not included) to protect its data. This only allows the SD card information to be accessed from your device with a password.

1. From Settings, tap Biometrics and security > Encrypt SD card.
2. Tap Encrypt SD card and follow the prompts to encrypt all data on your memory card.

NOTE Performing a Factory data reset on your device prevents it from accessing an encrypted SD card. Before initiating a Factory data reset, make sure to decrypt the installed SD card first.

Decrypt SD card

You can decrypt an optional memory card (not included) if it was encrypted by this device. You may want to decrypt the memory card if you plan to use it with another device or before performing a Factory data reset.

1. From Settings, tap Biometrics and security > Decrypt SD card.
2. Tap Decrypt SD card and follow the prompts to decrypt all data on your memory card.

View passwords

You can have characters displayed briefly in password fields as you type them.

- From Settings, tap Biometrics and security > Other security settings > Make passwords visible to turn on the feature.

Security update service

You can set your device to automatically check for security updates.

- From Settings, tap Biometrics and security > Other security settings, and then tap Security policy updates to check for security updates.
Device administration

You can authorize security features and apps (like Find My Device) to have administrative access to your device.

1. From Settings, tap Biometrics and security > Other security settings > Device admin apps.
2. Tap an option to turn it on as a device administrator.

Credential storage

You can manage the trusted security certificates installed on your device, which verify the identity of servers for secure connections.

- From Settings, tap Biometrics and security > Other security settings for the following options:
  - Storage type: Select a storage location for credential contents.
  - View security certificates: Display certificates in your device’s ROM and other certificates you have installed.
  - User certificates: View user certificates that identify your device.
  - Install from device storage: Install a new certificate from storage.
  - Clear credentials: Erase credential contents from the device and reset the password.

Strong protection

Better protect your device by encrypting it using a secure lock type.

- From Settings, tap Biometrics and security > Other security settings > Strong protection, and then tap to enable this feature.
Advanced security settings

You can use these options to configure advanced security settings to better protect your device.

- From Settings, tap Biometrics and security > Other security settings for the following options:
  - Trust agents: Allow trusted devices to perform selected actions when connected.
    - This option is only displayed when a lock screen is turned on. For more information, see Set a secure screen lock.
  - Pin windows: Pin an app on your device screen, which prevents access to other features of your device.

Location

Location services use a combination of GPS, mobile network and Wi-Fi to determine the location of your device.

1. From Settings, tap Biometrics and security > Location.
2. Tap to turn on Location services.
3. Tap Improve accuracy to use other connections for determining your location:
   - Wi-Fi scanning: Allow apps and services to scan for Wi-Fi networks automatically, even when Wi-Fi is turned off.
   - Bluetooth scanning: Allow apps to scan for and connect to nearby devices automatically through Bluetooth, even when Bluetooth is turned off.

Tip: Some apps require location services be turned on for full functionality.

Recent location requests

View a list of apps that have requested your location.

1. From Settings, tap Biometrics and security > Location.
2. Tap to turn on Location services.
3. Tap an entry under Recent location requests to view the app’s settings.
Location services
Location services store and use your device’s most recent location data. Certain apps can use this data to improve your search results based on places that you have visited.

1. From Settings, tap 🕵️‍♂️ Biometrics and security > Location.
2. Tap an entry under Location services to see how your location information is used.

App permissions
Apps might access features of your device that you permit them to (like the camera, microphone, or location) when they are running in the background, not just when you are using the app. You can set your device to notify you when this happens.

1. From Settings, tap 🕵️‍♂️ Biometrics and security > App permissions.
2. Tap a category, and tap 🔴 next to the apps you want to be notified about.
   • Tap an app to select which permissions you want to be notified about.

Send diagnostic data
Send diagnostic information about your device to Samsung when you are having technical problems.

1. From Settings, tap 🕵️‍♂️ Biometrics and security > Send diagnostic data.
2. Read and accept the consent information to enable this feature.
**Accounts**

You can connect to and manage your accounts, including your Google Account, Samsung account, email, and social networking accounts.

*Add an account | Account settings | Remove an account | Users | Samsung Cloud | Backup and restore | Google settings*

**Add an account**

You can add and sync all your email, social networking, and picture and video sharing accounts.

1. From Settings, tap 🔄 Accounts and backup > Accounts > + Add account.
2. Tap one of the account types.
3. Follow the prompts to enter your credentials and set up the account.
   - Tap **Auto sync data** to enable automatic updates to your accounts.

**Account settings**

Each account has its own custom settings. You can configure common settings for all accounts of the same type. Account settings and available features vary between account types.

1. From Settings, tap 🔄 Accounts and backup > Accounts.
2. Tap an account to configure that account's sync settings.
3. Tap other available options for the account type.

**Remove an account**

You can remove accounts from your device.

1. From Settings, tap 🔄 Accounts and backup > Accounts.
2. Tap the account and then tap **Remove account**.
**Users**

Share this tablet with multiple people by creating User accounts.

Users have their own space, which they can customize with their own apps, wallpaper, and settings. Users can also adjust tablet settings that affect everyone, such as Wi-Fi.

1. From Settings, tap 📈 Accounts and backup > Users.
2. Tap Add user or profile and follow the prompts to set up a new user or profile.

💡 TIP Restricted profiles allow only limited access to apps and content.

**Delete a User or Profile**

1. From Settings, tap 📈 Accounts and backup > Users.
   - For a restricted account, tap 🌃 Settings next to the user profile.
2. Tap 🗑 Delete, and then confirm when prompted.

⚠️ NOTE Only the device owner can delete other users or profiles. Deleting a user’s profile removes the user account from the device entirely. This includes the user’s Google Account, Samsung account, and any other local accounts associated with the user.

**Samsung Cloud**

You can keep your data safe by backing up and restoring your device. You can also sync your data from multiple devices. For more information, visit samsung.com/us/support/owners/app/samsung-cloud.

1. From Settings, tap 📈 Accounts and backup > Samsung Cloud.
   - If a Samsung account has not been added, the screens explain how to create or sign in to your account.
2. Once a Samsung account is configured, you can view and manage items stored in the Samsung Cloud.
Backup and restore

You can configure your device to back up data to your personal accounts.

**Samsung account**

You can enable backup of your information to your Samsung account.

- From Settings, tap 🔄 Accounts and backup > Backup and restore for options:
  - **Back up data**: Configure your Samsung account to back up your data.
  - **Restore data**: Use your Samsung account to restore your backup data.

**Google Account**

You can enable backup of your information to your Google Account.

- From Settings, tap 🔄 Accounts and backup > Backup and restore for options:
  - **Back up my data**: Enable back up of application data, Wi-Fi passwords, and other settings to Google servers.
  - **Backup account**: Select a Google Account to be used as your backup account.
  - **Automatic restore**: Enable automatic restoration of settings from Google servers.

**External storage transfer**

You can back up your data to an SD card or a USB storage device, or restore backup data using Smart Switch. For more information, see Transfer data from an old device.

- From Settings, tap 🔄 Accounts and backup > Backup and restore > External storage transfer.

**Google settings**

You can configure your device’s Google settings. Available options depend on your Google Account.

- From Settings, tap Google, and select an option to customize.
Accessibility

There are accessibility settings for people who need help seeing, hearing, or otherwise operating their device. Accessibility services are special features that make using the device easier for everyone. For more information about Accessibility for Samsung products, please contact us at accessibility@sea.samsung.com.

Screen reader | Visibility enhancements | Hearing enhancements | Interaction and dexterity | Advanced settings | Installed services

Screen reader

Use special controls and settings that let you navigate without needing to see the screen.

From Settings, tap Accessibility > Screen reader and tap an option:

• Voice assistant: Receive spoken feedback when using your device, such as what you touch, select, or activate.
• Tutorial: Learn how to use Voice assistant.
• Settings: Configure Voice assistant to better assist you.

Visibility enhancements

You can configure Accessibility features to assist with visual aspects of your device.

Colors and clarity

You can adjust the colors and contrast of text and other screen elements for easier viewing.

From Settings, tap Accessibility > Visibility enhancements and tap an option:

• High contrast fonts: Adjust the color and outline of fonts to increase the contrast with the background.
• High contrast keyboard: Adjust the size of the Samsung keyboard and change its colors to increase the contrast between the keys and the background.
• Show button shapes: Show buttons with shaded backgrounds to make them stand out better against the wallpaper.
• **Remove animations**: Remove certain screen effects if you are sensitive to motion.

• **Color inversion**: Reverse the display of colors from white text on a black background to black text on a white background.

• **Color correction**: Adjust the color of the screen if you find it difficult to see some colors.

**Size and zoom**

You can increase the size of supported screen elements and create shortcuts for accessibility features on your device.

○ From Settings, tap 🎯 **Accessibility** > **Visibility enhancements** and tap an option:
  - **Magnifier window**: Magnify content shown on the screen.
  - **Magnification**: Use exaggerated gestures such as triple-tapping, double pinching, and dragging two fingers across the screen.
  - **Large mouse/touchpad pointer**: Use a large pointer for a connected mouse or touchpad (accessories not included).
  - **Font size and style**: Configure screen fonts.
  - **Screen zoom**: Configure the screen zoom level.

**Hearing enhancements**

You can configure Accessibility features to assist with audial aspects of the device.

**Sounds**

You can adjust audio quality when using hearing aids or earphones.

○ From Settings, tap 🎮 **Accessibility** > **Hearing enhancements** and tap an option:
  - **Mute all sounds**: Turn off all notifications and audio for privacy.
  - **Left/right sound balance**: Use the slider to adjust the left and right balance when listening to audio in stereo.
  - **Mono audio**: Switch audio from stereo to mono when using one earphone.
**Text display**

You can watch closed captions when viewing multimedia.

- From Settings, tap 🏷️ **Accessibility** > **Hearing enhancements** and tap an option:
  - **Samsung subtitles (CC)**: Use Samsung subtitles with multimedia files when available.
  - **Google subtitles (CC)**: Use Google subtitles with multimedia files when available.

**Interaction and dexterity**

You can configure Accessibility features to assist with limited dexterity when interacting with your device.

**Alternate input**

You can control your device using different kinds of inputs and controls.

- From Settings, tap 🏷️ **Accessibility** > **Interaction and dexterity** and tap an option:
  - **Universal switch**: Control your device with your customized switches.
  - **Assistant menu**: Improve device accessibility for users with reduced dexterity.
  - **Click after pointer stops**: Automatically click on an item after the pointer stops over it.

**Interactions**

You can simplify the motions needed to respond to notifications and alarms.

- From Settings, tap 🏷️ **Accessibility** > **Interaction and dexterity** and tap an option:
  - **Interaction control**: Customize areas of screen interactions, hardkeys, and the keyboard.
Touch settings

You can adjust your screen to be less sensitive to taps and touches.

○ From Settings, tap Accessibility > Interaction and dexterity and tap an option:
  • Touch and hold delay: Select a time interval for this action.
  • Tap duration: Set how long an interaction must be held to be recognized as a tap.
  • Ignore repeated touches: Set a time duration in which to ignore repeated touches.

Advanced settings

You can customize additional accessibility features and services for your device.

💡 TIP Additional accessibility apps may be downloaded from the Google Play store.

Direct access

○ From Settings, tap Accessibility > Advanced settings and tap an option:
  • Power and Volume up keys: Configure selected Accessibility settings to open by quickly pressing the Power and Volume up keys at the same time.
  • Volume up and down keys: Configure selected services to turn on when you press and hold the Volume up and Volume down keys for three seconds.

Notifications

○ From Settings, tap Accessibility > Advanced settings and tap an option:
  • Notification reminders: Set periodic reminders for any unread notifications.

Installed services

You can install additional assistance services for your device.

○ From Settings, tap Accessibility > Installed services.

💡 NOTE Additional accessibility services are listed and configured here after they are installed.
Other settings

Configure features on your device that make it easier to use.

Help | Daily Board | About tablet | Learn more | Legal information

Help

View the user manual on your device.

- From Settings, tap Help.

Daily Board

View a slideshow of your photos when your tablet is charging.

1. From Settings, tap Advanced features > Daily Board.
2. Tap to enable Daily Board.
3. Choose one of the following options:
   - Slideshow: Enable a button that launches a slideshow of images from Gallery.
   - Time, weather, and calendar: Display the current time, current weather, and a calendar.
   - Memo: Create memos while the device is charging.
   - Music: Set music to play while the device is charging.
   - Turn off as scheduled: Set a schedule time to turn the device off.
     - Set time: Select a turn off time.
   - About Daily Board: View the app version and other information.

About tablet

View information about your device, including current status, legal information, hardware and software versions, and more.

1. From Settings, tap About tablet, and then view your model number, serial number, and IMEI information.
2. Tap additional items to view more information about your device.

TIP: You can view your device's FCC ID from About tablet > Status.

Arbitration Agreement - This Product is subject to a binding arbitration agreement between you and SAMSUNG ELECTRONICS AMERICA, INC. (“Samsung”). You can opt out of the agreement within 30 calendar days of the first consumer purchase by emailing optout@sea.samsung.com or calling 1-800-SAMSUNG (726-7864) and providing the applicable information.

The full Arbitration Agreement, Standard One-year Limited Warranty, End User License Agreement (EULA), and Health & Safety Information for your device are available online:

**Tablet:**

- English: samsung.com/us/Legal/Tablet-HSGuide
- Spanish: samsung.com/us/Legal/Tablet-HSGuide-SP

This information can also be found on the device in the “About device” or “About phone” or “About tablet” section, for example:

- Settings > About phone or About device or About tablet > Legal information > Samsung legal
- Or, search “Legal”

If your device required Federal Communications Commission (FCC) approval, you can view the FCC certification by opening Settings > About phone or About device or About tablet > Status.

**Samsung Knox**

Samsung Knox is Samsung’s security platform and is a mark for a Samsung device tested for security with enterprise use in mind. Additional licensing fee may be required. For more information about Knox, please refer to: samsung.com/us/knox.
Restricting children’s access to your mobile device

Your mobile device is not a toy. Do not allow children under the age of 3 to play with it because they could hurt themselves or others or damage the device. If parents choose to allow children 3 or older to use the device, they should make sure that there is adequate supervision to guard against injury or damage and use of services that may increase data costs or other charges.

Parental control settings should be enabled to ensure that children do not have access to services or content not approved by the parent. Routinely check this device to ensure it is working properly and is safe for children to use.

Some multimedia (audio/video) files contain Digital Rights Management (DRM) technology to verify you have the right to use the files. Preloaded apps on your device may not be compatible with DRM-protected files.

Screen images are simulated. Appearance of device may vary.
The actual available capacity of the internal memory is less than the specified capacity because the operating system and default applications occupy part of the memory. The available capacity may change when you upgrade the device.

Please check with your service provider to verify qualifying services/features.
