

# Commercial coverage guidelines for Magic Box

## Magic Box coverage range

- Coverage will vary based on building morphology
- Best results require the Magic Box oriented such that the back faces outside and the front faces the area requiring coverage
- Magic Box can be clustered together to cover larger buildings and multiple floors

- Place Magic Box every other floor vertically

- Keep Magic Boxes a minimum of **30 meters** away from each other side to side, **60 meters** front to front

- Magic Box has a reach of **30-60 meters** from face
- Overall coverage of **20K-30K sqft**

- Face back of Magic Box toward the outside network where there are as few obstructions as possible such as an outside window

## Magic Box placement guidelines

Clutter will have an impact on minimum separation
